Measure, Appointment or Topic: HB2738

I live in Kenton. PIR is a fact of life here - the noise and the pollution. I realize that many enjoy the racetrack, and I have to put up with the noise, as much as I wish I didn't have to. ut But I shouldn't have my personal health endangered by pollution from leaded gas. Pollution from PIR endangers my health, and the health of my neighbors, local wildlife, etc..

I grudgingly support PIR, because I know some people enjoy it. However, races at PIR cannot be at the detriment to others, and that is the situation we currently have with PIR and North Portland residents. I am 100% in favor of banning leaded gasoline at PIR. Cars run just fine on unleaded gasoline. It's a matter of public health.
