

Submitter: Brittany Colwell
On Behalf Of: Colwell Family
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2738

PIR has been supporting our community since they opened. From teen driving education to all proceeds from their winter lights to local charities. This could potentially jeopardize a portion of their 500 jobs. And the estimated 35 million dollars it generates for the regional economy. This will affect almost every aspect of that facility. Not to mention the spectator aspect that has been around for over 60 years. Bringing people to Portland from all over the world for events. Passing this is a terrible decision for our community as a whole.
