

Submitter: John Savona

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I'm opposed to HB 2738.

PIR is a valuable asset to Oregon, SW Washington and brings in much needed money to the local governments. It brings worldwide notoriety to Portland with it's big time racing venues such as Nascar and IndyCar. Where is the science on actually how much lead is being emitted and the exposure it allegedly creates. You can't just go off of non-scientific

allegations. There is very little in the way of leaded fuels being used and the amount yearly events is relatively small. What about the exposure from the freeway and all of the cars and trucks on a 24hr basis. What about the pollutants from daily aircraft landings and take-offs? No complaints on either of those. The freeway dumps out more pollutants than anything.

I urge voting down this proposterios Bill until the alleged harm can be scientifically proving.
