Environment
Measure, Appointment or
Topic: HB2738

During the summer, every Wed. night along with the drag racing, 1000's of cars come to participate in a car cruise. The car cruise raises thousands for charity. It bothers me that there has not been a financial impact statement submitted. I also wonder how it would be enforced. Many of the race cars use E85, which is a non-leaded fuel. Regular octaine pump gas is also not leaded. Some show cars and race cars do run on leaded fuel, would this be enforced on the word of the car owner? Seems that this bill was rushed with very little research done.

Respectfully submitted.
