

Submitter: Tim Crump

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I wanted to voice my strong support for HB 2738. As a nurse practitioner, the risks of lead exposure, especially to children, are very clear and well-established. As someone who lives close enough to the Portland International Raceway to be able to hear the racecars on certain days, I am concerned for the exposure to lead to the children in my neighborhood and so many nearby neighborhoods. Please do the right thing and ban the use of lead gas at the PIR! Thank you so much! Tim Crump, MSN, FNP
