

Submitter: John Barnum

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I have supported PIR since 1961. Myself and thousands of other people have paid and support many local businesses. Banning lead fuel does not make sense Why, the amount of fuel you used is not even a measurement. There far more other issues that need to be addressed than events at PIR. Such as expanding I5 in the Portland area The amount pollution caused by cars caught traffic jams at least twice a day.

Please realize that many of the cars using PIR do not use Leaded Fuel. If the bill passes that will limitinate. Events at PIR. But also close many local businesses.

Please vote NO and Oppose this bill
