

Submitter: Danny Oneil

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

Pir has been around a long time, it brings in great revenue, and does great things for the community, for those of us who are car lovers this is one of few outlets we have left. Those who oppose need to accept the few places we have left. We are not trying to vote them out, I don't think it's fair they vote ours out! What we do is not as harmful to the environment as they make it seem, nothing lasts forever so let the tracks have their shot at succeeding. I think having the track does more good by far than harm. Thanks for listening.. Danny Oneil
