

Submitter: Randy Cox
On Behalf Of: Freedom
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2738

This bill has absolutely no proof or science behind what it assumes. The use of leaded fuel at a race track, that is under or near an air port that has hundreds of flights a day will make no measurable or ill effects what so ever. I doubt that any air quality testing in the area could even pickup on the lead byproducts of leaded fuel. Making rules and laws just as feel good ideas is not what Oregon wants or needs.
