

Submitter: Hayden Kaelon

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

While I understand the need for environmental protection and public health, I believe this bill would hurt the racing industry and the people who rely on it. Many race tracks and racing events depend on leaded fuel to operate, and banning it could force tracks to close or reduce their activities. This would have a negative impact on the local economy, jobs, and tourism in these areas.

Instead of a blanket ban, I believe the racing community should be allowed to work with experts to find safer, more sustainable fuel options while preserving the sport's history and economic benefits.

I ask that you reconsider this bill and look for other ways to address these concerns.

Thank you for your time and consideration.
