Measure, Appointment or Topic: HB2738

Hearing this makes me ask...how long have these races been running? How many health issues have there been? Why stop them now?? Is it a complaint of a few that is making this happen. With passed test showing levels of air quality safe why is it okay to stop them. I know I'm not eloquent in my words and writings, but why try to stop these races if everything has been checked and said it was safe. To what end will people go to take away these races. I know many people, male and female, that have been racing for many years and have not heard of any health issues from being at the tracks. Please let the races continue !
