On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I know many people are passionate about racing. I am a lover of sports as well, but we should unite to figure out ways to participate in sports safely. Leaded gasoline is considered extremely harmful to human health, causing significant neurodevelopmental damage in children, particularly impacting cognitive function, and also linked to cardiovascular issues in adults, making it a major public health concern; essentially, no level of lead in gasoline is considered safe.
