

Submitter: Megan Gaynor

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I strongly oppose this measure. As someone who has been going to PIR on a consistent basis since I was a child, now at 42 years old, I do not think this measure is a valid concern. I have been a part of the drag racing community my entire life and have experienced zero adverse effects of the fuel or any other exposure at any race track.
