

Submitter: Jillian Pellham

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I, a resident of Oregon City, OR do not support this bill. There are better things as a citizen, and an American we should be bidding our time on, rather than attacking something that has built not only communities, but family. The gas powered car support at PIR and many other raceways, many call their weekend home. Let's focus on the price of eggs, and helping out the backbone of America, our farmers and agriculture instead.

Sincerely,  
The car community
