February 19,2025

We have just received information regarding SB 976.

As owners of equine and cattle, we are concerned about the approval of unlicensed personnel practicing Veterinary Medicine. Veterinarians go through intense medical training to assure the health, comfort and well being of their patients.

We would hope you would take into consideration the necessary medical training and pharmacology used in treating animals for dental or reproductive procedures.

We do not support this bill and ask you to vote accordingly with your constituency.

Thank you,  
Kate and Gary Bottger
