Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I live within 25 miles of the portland race way. I am a school social worker and want to make sure I advocate for the health of our youth! We have regulations prohibiting leaded gas for everyday use, regulations on preventing the use of leaded paint. Why would we not regulate leaded petrol use at our PIR? All of us deserve the right to clean air, the respect for the Portland International Race track to stop putting lead into our air. Please pass this bill banning leaded gas use at the PIR.
