Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

HB 2738

This bill will have a huge negative economic impact in that no professional car races would come to Portland International Raceways if passed. This is millions and millions in lost revenue for Oregon. How you can come up with a stupid bill like this is beyond belief. There has been no evidence of a lead problem at PIR and you are willing to take away fun for over a hundred thousand Oregonians each year that go to spectate or participate in the club and professional races at PIR.

Please focus your efforts on some of the real problems Oregon faces. How about the drug problem perhaps focus on cleaning up the needles everywhere which is a real health problem. How about stopping the graffiti problem and the thousands of gallons of paint you waste covering it up to just give them a clean canvas. How about the trash the homeless create that is everywhere, another far more important environmental problem than a small amount of leaded gas in use. Do I need to go on or can we just kill this bill?
