

Submitter: Brian Stansberry
On Behalf Of: PIR
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2738

Sorry if this is in here twice. I'm in opposition to this because this matter of leaded fuels being bad has already been checked and proven not to be a hazard! When it was checked they not only checked outside the area of PIR but right at the track. All test showed low levels and not a health problem at all! So reading a statement from someone making a blanket statement that any lead gas is dangerous and unhealthy is so outlandish it's ridiculous. This venue has been here for years bringing in millions of dollars to the community and so far we have proven it safe and the opposition is saying the sky is falling. Please don't take this family attraction away and send kids out on the streets to race.
