

Submitter: Angela Heriford  
On Behalf Of: 3 generations of PIR Racers  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB2738

Chair Lively and committee members, I strongly urge you to oppose passing HB 2738. At this time there is no data supporting claims that lead emission is at or above any dangerous levels per data from DEQ as well as OHA. Also, Representative Nelson stated it during his interview with KATU 2 News that "There's not necessarily causation, but a bit of correlation as it relates to Portland International Raceway",

If this bill passes it will very likely result in the closure of PIR after 60+ years of operation. Please consider that over 500 individual events take place each year at PIR. That 50+ user groups make use of the track, fully fund the operation of the track and will all be displaced if the bill, that in fact does not have supporting data, were to pass. Thank you for your consideration.
