Subject: Support for House Bill 3219 – Sustained State Funding for the Oregon Hazards Lab

Dear Chair Hudson, Vice-Chairs Harbick and Fragala, and Members of the Committee,

On behalf of the City of Rogue River, I am writing to express our strong support for House Bill 3219, which seeks to establish sustained state funding for the Oregon Hazards Lab (OHAZ) at the University of Oregon. As a city identified by the Oregon State Fire Marshal as being a wildfire-vulnerable community, we recognize the vital role that the Oregon Hazards Lab plays in ensuring the safety and security of Oregonians in the face of natural and human-made hazards.

Our City has a very high proportion of elderly and disabled citizens, as well as a street system with a lack of complete connectivity, leaving high risk citizens in high risk areas when it comes to evacuation routes. Advanced notice for Emergency Response efforts is a vital piece of keeping citizens safe in the City of Rogue River and the greater Rogue River community.

OHAZ is a critical asset to disaster preparedness and response efforts in Oregon and adjacent states. Through its seismic, wildfire, and remote sensing networks, OHAZ provides **real-time, life-saving data** that helps emergency responders and communities mitigate the impact of earthquakes, wildfires, landslides, and other disasters.

In particular, the **ShakeAlert Earthquake Early Warning System** can provide crucial seconds of advance notice before severe shaking begins, allowing Oregonians to take protective action. Additionally, **OHAZ's wildfire detection and situational awareness systems** are increasingly vital in an era of escalating fire risk, enhancing rapid response and reducing destruction. These programs are **not theoretical; they are active, operational systems that directly protect lives and property.**

Investing in OHAZ is a smart financial decision. Hazard monitoring and early warning systems save Oregon millions of dollars by reducing disaster response costs, infrastructure damage, and economic disruption. Without sustained state funding to maintain and expand its infrastructure, the long-term viability of these programs is at risk, leaving our communities more vulnerable at a time when proactive resilience planning is more critical than ever.

We urge you to take **decisive action** by passing House Bill 3219 and securing the future of OHAZ. Doing so will ensure Oregon remains a leader in disaster resilience, protecting lives, property, and the state's economic well-being.

Thank you for your time and consideration. We appreciate your leadership in advancing policies that safeguard our communities, and we stand ready to support you in this effort.

Sincerely,

Pam VanArsdale
Mayor, City of Rogue River
