

Submitter: Mark James

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

Take air samples in the only neighborhood that's anywhere close to PIR just south of the track for one year and report to results. Then see if they are not acceptable limits before you start a knee jerk reaction that Portland is famous for, like defunding the police department that only cost tax payers more money to fix !!!
