

Submitter: Damien Gunter

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

This bill solves a problem that was created by the people who are affected by it. If anything, housing developers should not be allowed to build homes within a certain distance of race tracks which use leaded fuel. This bill will directly harm the livelihood of many people all because developers did not do their due diligence, did not care about the inhabitants of their homes, and did not take the necessary steps to warn said inhabitants about the risks of living in the environment that THEY concocted. I am incredibly opposed to this bill, it is unjust and unfair, a direct attack on the wrong group.
