

Submitter: Claire Burgess

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2357

I'm a 33-year-old business owner from Seattle, running a fully remote speech and voice clinic operating in Washington, Oregon, and New York. Our remote model is essential because it allows us to reach clients who may not have access to specialized voice services locally while staying competitive against established hospital speech clinics. This approach fosters innovation and enables us to connect with clients beyond the states where we're licensed.

Please support HB 2357 to ensure that new and growing businesses like ours can continue to compete, drive innovation, and expand access to care across state lines, keeping the market fair and dynamic.
