

Submitter: Layla Ramirez

On Behalf Of:

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure, Appointment or Topic: HB3062

Good afternoon, my name is Layla Ramirez. I am a student at Parkrose High School. And part of the Parkrose community. I want to oppose HB3119/SB509

I want to support HB3062, because it reduces harm to sensitive people, in factories for example, it reduces harm to sensitive people, it is distribution of the "goods" and other HB's are harmful to our air, we want clean air not dirty air, it's bad for the people who have asthma and people who already have bad enough air. This house bill 3062, is good for us because it's for sensitive use, to people as well as industrial use for sensitive uses to our land etc:

This is for warehouse distribution, light manufacturing, in my opinion having a better option should be the only option, and opposing the other house bills that can potentially hurt people and make them have severe breathing problems than they already have.

I personally think people purposely put these bad house bills in lower income areas and never the high class areas, it shows how much wealthy people want these horrible bills to get passed and not have it happen in their areas, we always have bad air and people in "wealthier areas" have less bad air, so consider hearing this.

I'm concerned for the elderly people if the bill we are opposing gets done, it can harm us all. As an Oregonian many people agree with me and we want clean air, thank you for taking time to listen and hear my opinion as well as caring for you to consider supporting "HB3062" with me.
