

Submitter: Roxana Kaferly

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB726

I strongly support bill SB 726 requiring surveillance via satellite or drone of the entire landfill for methane violations. It causes me great anxiety worrying about methane fumes causing me physical harm as well as the large danger of a wildfire being started at Coffin Butte Landfill spreading throughout Willamette Valley especially Corvallis and my home in Adair Village. I have been following the reports of extremely high levels of methane violations at Coffin Butte. Thank you for your consideration.
