

Submitter: Aaron Olmstead

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB3439

I've been using ND's for over 40 years. I've also been paying out of pocket for half that time while paying f#!king insurance companies there premiums and receiving no help from them. Insurance companies have a stranglehold over the medical field. ND's have twice to three times the qualifications as most MD's and no comparison to PA's. They show up every day to take care of patients and treat the whole person. Unlike MD's & PA's that are there for the check and BIG pharma. The medical profession is in a sad state of affairs with board members siphoning off money and dumbing down healthcare. ND's deserve better recognition and equal compensation for their care. Thank you.
