

Submitter: Sue Craig
On Behalf Of: Oregon Unitarian Universalist Voices for Justice
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2410

Thank you for this opportunity to testify. As a faith organization we are concerned that another bill has been put forth to push for small nuclear reactors. Presently, we humans have not found a way to contain nuclear waste. You are all well aware how long it takes these multiple components in the waste to deteriorate to a point where they will not cause damage to the environment and to humans/life. Please stop this before it starts. We do not need to spend any money on a situation that is not viable in any way. Please for all concerned, we can spend money on real energy sources, like wind and solar. We can do that in a much more timely fashion, and significantly less money, than small nuclear reactors.

Thank you. Sue Craig President of Oregon Unitarian Universalist Voices for Justice.
