

Submitter: Jim Stratton

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB726

I've followed the information available to me regarding the proposed expansion of the Coffin Butte landfill in Benton County with growing concern. I believe SB 726 would benefit the county and state by providing a neutral assessment of the environmental impact of that and other state landfills, free of the appearance of corporate conflict of interest. Requiring more accurate data is, I believe, in the best interest of all Oregon citizens and beneficial to the environment we live in.

Please pass SB 726.
