On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB3435

There shouldn't even be a survey as to why school meals are important, think about it. A lot of families can't afford to make their child a healthy nutritious meal before school, especially with the rising costs of food. Children need a well rounded meal so they can perform better in school, have energy to play at recess, and to retain what they have learned in school. Fund our children's future by serving them nutritious food! Don't put more money into the pockets of billionaires and politicians who, quite frankly, don't care. We care! Our kids are the future.
