Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB726

I strongly support SB 726. Oregon does not do enough to ensure air quality protection for residents (especially those living in semi-rural or rural areas of the State), or to reduce methane pollution that promotes negative climate change, whether it's unmonitored landfills or belching smokestacks at ReWorld Marion incinerator. Passing protective laws has little impact unless there's enforcement, and enforcement of fines should be directed to paying for the monitoring in this bill.
