

Submitter: Dave Peticolas

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3628

Oregon has under-invested in its electrical transmission grid and this has and will continue to slow our transition to abundant sources of clean energy. This bill would spur much-needed investment in transmission capacity through public-private partnerships and help to streamline projects through effective coordination. Please support this bill and help Oregon provide clean and abundant energy to all Oregonians.
