

Submitter: April Gilliom

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB3439

I am currently in the process of joining the Cow Creek Health and Wellness Center as a Naturopathic Doctor for the Cow Creek Band of Umpqua Tribe of Indians, due to community demand for a Naturopathic Doctor to offer a broader range of treatment modalities for otherwise treatment resistant conditions. I have recently been credentialed with Umpqua Health Alliance CCO. My hope for the Tribe is that they can be reimbursed by insurers fairly, as I work as a Doctor, providing naturopathic care to Tribal Members and other established patients at the center, as I work with patients to reduce risk of and reverse chronic diseases, that are otherwise costly to individuals, the Tribe, Oregon, and the country.

The members of the Patient Advocates for Naturopathic Physicians and the Oregon Association of Naturopathic Physicians (OANP) urge you to pass HB3439 out of the House Committee On Behavioral Health and Health Care. With 1200 Licensed Naturopathic Physicians serving over 100,000 Oregonians each year, HB3439 will help improve delivery of primary care services in our state.

HB3439 requires that insurance companies pay naturopathic doctors (ND) fairly and on par with what other primary care providers are paid for providing the same services. Currently, NDs are reimbursed on average at half the rate of PAs, NPs, DOs and MDs. NDs are well-regulated and licensed as primary care providers. Thousands of Oregonians seek out the safe, effective and integrative care that NDs provide.

Every year, NDs are financially forced to either lay off staff and close their clinics or to move to a cash model, excluding those who are not affluent. This is diminishing Oregonians' access to safe and effective naturopathic care and we as a state should not be complicit in this. Oregon is currently experiencing a primary care provider shortage which will only be exacerbated if HB3439 does not advance.

HB3439 has a minuscule fiscal impact of 3 million dollars embedded in the OHA biennial budget, yet the profound positive impact on patient care for Oregonians far outweighs the cost. This allocation would go toward primary care, which has been a priority of this legislature. HB3439 will not only increase patients' ability to choose their doctors, but will also support the hundreds of small businesses across the state that provide naturopathic care.

Please vote "YES" on HB3439 at its upcoming hearing.
