

Submitter: Kenneth Pastega

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB726

Four is educated as Benton County is in the state of Oregon. They had to wake up and clean up the state instead of polluting it, and in creating healthcare issues for the residence with polluting water and the while I'm at river, it's sad to see that government agencies when there's money to be made like the county of Rorie county of Benton County \$2 million. They'll look the other way and polluting the residence. Legislators shouldn't look the other way they should act like the landfill is in their backyard. When the wind blows it ends up at our residence make a difference get a backbone.
