On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB3439

I am in support of this bill. My support does not negate any of the important work of conventional medicine, but instead points to naturopathic medicine working in tandem for more positive health outcomes overall. Prevention is often addressed in naturopathic medicine, and it is key for better health for our community.

If I had not seen a naturopathic doctor and continued care, I would currently have chronic conditions and be more at risk for cardiovascular health issues. I owe this shift in my health to naturopathic medicine.
