

Submitter: Inga Fisher Williams

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3336

In support of transmission related improvements, regarding capacity, organization and structure. This relatively “unsexy” legislation is foundational and will strengthen Oregon’s electricity planning. GETs should become part of utility IRPs and OPUC review. It will be innovative and ultimately cost-saving.

I encourage your support.

Thank you,

Inga Fisher Williams, Portland
