

Submitter: Judi Skillman

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB726

I am writing in HUGE support of SB 726! Our leaking landfills are the result of us humans making a mess of life on earth. The very least we can do for the planet is to clean our mess the best we can. This means we MINIMIZE, MITIGATE, and at the very least MONITOR our messy methane emissions! The future and health of all living things depends on it! SUPPORT SB 726! Thank you, Judi Skillman
