On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3628

HB 3628 is a critical part of Oregon's transmission line policies, planning and financing by creating an independent public corporation. I support the legislation's clear outline of its powers and responsibilities. Its creation fills a current gap in the state's management of transmission corridors, financing and owning, including upgrades. I applaud the inclusion of a Tribal Advisory Council on transmission planning, an often ignored component in state infrastructure planning, that gives indigenous communities a seat at the table. I encourage your vote in support.
Inga Fisher Williams, Portland
