

Submitter:

Donna Bleiler

On Behalf Of:

Committee:

Senate Committee On Judiciary

Measure, Appointment or Topic:

SB680

I STRONGLY OPPOSE SB 680

This is politically motivated. Everyone knows that net-zero is unobtainable, still the government is the biggest violator of mal-information regarding green house emissions. To determine if marketing is materially false, it must be competent and reliable scientific evidence. Scientist can't agree and false reports abound, so who is going to judge which experts are to be believed without political bias? This is government hypocrisy at its finest.
