

February 22, 2025

Dear Oregon Legislator-

I am writing to encourage you to support Oregon children and their education by supporting Bill # 322 in support of Oregon Substitute Teachers.

As a guest teacher myself, I can assure you that there are many improvements that can be made in Oregon education and for Oregon Subs, but these substitute support Bills are an essential start to a process that will ideally bring more functionality and professionals into service.

As a professional from another field, I have taught throughout my life, originally starting at Portland Community Colleges in the late 1980's. Now I live a rural life and pursue things at a different pace, however, since 2020 I've been an Oregon Licensed substitute and have been doing my best to give back to my local rural communities by sharing years of professional experience and education with those children in rural areas. I can tell you that they need our help!

With the reduction of standards in education, the outsourcing of substitutes as represented in Bill 323, the shortage of substitutes, the chronic dysfunction of many districts, I want to clearly be on the record that these substitute issues should be a priority to every state legislator! Such that every stakeholder in Oregon education is treated fairly and professionally, with due respect, proper professional oversight, opportunities for appropriate training, and due process, and that the guide shall be educational outcomes.

Thank you in advance for your consideration and support!

Sincerely,  
Jon Deshler  
VP OSTA
