

Submitter: Jan Zuckerman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2038

The voters made it very clear decades ago that nuclear energy is not wanted in the state of Oregon until there is a safe, permanent way to dispose of the deadly waste. This has not happened. We do know that it lasts for a quarter of a million years and industry does not manage it well.

It is expensive, and gets in the way of a true transition to clean, SAFE energy. It is not a climate solution- especially when its life-cycle emissions are included in the calculation.

Please do not support HB 2038 without looking at the disadvantages of nuclear power.
