HB3194

I understand the need for cracking down on illegal labor camps connected to the illegal growing of marijuana. I don't think this bill will do that. We lease farmland for the purpose of farming and the people we lease from are not involved with the day to day operation of the farm, mostly due to becoming retired. Open farmland is not an issue. The problem comes when land is secluded and the illegal grows are hidden as well as the labor camp. People in town who rent houses don't go into the house every day to insure there is nothing illegal going on and owners of land should not have to do that either. I think more specific wording might help or perhaps another approach all together. Thank you.
