Committee: House Committee On Education

Measure, Appointment or Topic: HB3435

Please support this important funding! Children rely on school food for getting the essential nutrient intake they need each day. If we want productive students who are able to focus and learn at school having adequate nutrition is key. We want students to succeed and move forward as people that are having their basic needs meant. The positive ripple effect will benefit all of our communities. On the other side if we can not provide this for our students the negative consequences will cost of more problems down the road. Thank you for doing what is right for families.
