

Submitter: Hilary and Robert White

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB726

Toxic chemical leakage into our air, water, and land will only become worse as the landfills age. SB726 requires monitoring by the owner/operator. However we know from the history of Coffin Butte "owner/operator" monitoring does not work. Their data have been questionable at best and certainly non reliable. We suggest the Bill be modified to require third party monitoring of the landfills.
