

Submitter: Melanie Davis

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

I oppose this certification. There is no evidence to suggest that this would go any better than any other nuclear plants in the US and if something were to go wrong (again) we have no recourse as a people. If there is no recourse there is NO ACCOUNTABILITY and even worse NO RESPONSIBILITY.

I graduated from Umatilla HS and know how close water is to all of these proposed areas. Nobody deserves the cancers Hanford created too. Stop this madness now.
