

Submitter: Christine Taylor

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2038

Please note that I submitted testimony about an hour ago, saying that I supported this Measure, but I realize that I misunderstood. I hope that you are able to disregard that earlier testimony and accept this corrected one instead.

With better understanding, I am now writing to strongly oppose HB 2038

Instead of looking into nuclear reactors, Oregon should be investing in green energy. We need to make a commitment to safe energy. I do not believe that nuclear reactors belong in any of our Oregon communities or anywhere in our State

In 1980 Oregonians voted for a moratorium on the building of nuclear power plants in our state. We need to respect that legal public expression.
