

Submitter: Kirsten Davis

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

Dear House Committee on Climate, Energy and Environment,

I am writing in opposition of HB 2410. In the past, the entire state of Oregon voted to prohibit development and use of nuclear energy due to its drawbacks—nowhere safe to store the waste product and potential for environmental disaster. One county should not be allowed to overturn the majority of the state on this issue. Instead, I strongly urge us to continue to develop clean energy and prioritize conservation and energy efficiency in our building codes. Nuclear energy is not the answer to our energy challenges, especially in this age of deregulation.

Sincerely,

Kirsten Davis
