

Submitter: Kirsten Davis

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2038

Dear Committee on Climate, Energy and Environment,

I am writing in opposition to HB 2038. This bill does not consider the use of nuclear energy in an even-handed way, as it only identifies the “advantages” to nuclear power and does not give equal consideration to its disadvantages. This is inherently undemocratic and intellectually dishonest and I urge you to strongly oppose its passage into law.

Sincerely,

Kirsten Davis
