

Submitter: Meg Bowman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3336

We need more efficient electric transmission systems to better use renewable energy and make our electric grid safer and more reliable. Installing Grid Enhancement Technologies, or GETs, will be the cheapest and quickest way to do this and create more capacity in our transmission system overall. Please support HB3336, which would require Oregon electric utilities to incorporate GETs in future planning.

Thank you,
Meg Bowman
