

Submitter: Anna Norman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3336

As Oregon faces increasing energy demands, enhancing our electrical grid is imperative. This is a crucial step toward modernizing our grid, improving reliability, and ensuring that communities across the state have access to a stable and resilient power supply. A stronger grid means increased energy security, better preparedness for climate-related disruptions, and a more sustainable Oregon for generations to come.

I urge lawmakers to support HB 3336 and prioritize the resilience and sustainability of our state's energy infrastructure.
