

Submitter: Pamela Fitzpatrick
On Behalf Of: self
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB726

I absolutely support SB 726.

In 2018 Colorado State University research showed that methane leakage from producing, gathering, processing, transmitting and storing natural gas was 60% higher than had been reported to and then by EPA.

Clearly we need better monitoring.

Thank you for working to make this happen. Pamela Fitzpatrick, Eugene, Oregon
