Care

Measure, Appointment or
Topic: HB3439

I am 54 years of age with a history of health issues including CFIDS. The various medical doctors that I went to did not know how to treat my ongoing and debilitating health challenges. Only when I found a naturopathic doctor was I able to find some solutions. It is important for the health and prosperity of America that naturopathic doctors be paid the same as other doctors so that they can effectively treat their patients. Please consider this.
